### **Brief description of the Transnational cooperation:**

#### **1. Problems to be solved** (justification of the need of the transnational cooperation)

The project aims to develop the skills of micro-companies in the Stockholm region in order to promote entrepreneurship, growth and sustainable development. It also aims to promote environments steeped in diversity, accessibility, innovation, creativity. The companies create a development and training plan in order to get a picture of the company's need for skills development. They then have the opportunity to take courses in areas such as leadership, project management, marketing, communications and marketing.

With transnational cooperation we hope to increase knowledge in the entrepreneurial field both for us as a project team but also for the companies participating in the project. We also want to increase opportunities for the companies to enter into collaboration for possible exchanges in form of exports and imports, or other types of collaboration.

#### **2. Objectives to be achieved**

Same as above.

#### **3. Main transnational activities** (as provisionally planned, to be confirmed with partners)

#### **4.**

Transnational cooperation shall include organisation of conferences, meetings and study visits.

#### **5. Planned outputs, deliverables, results of TNC; expected outcomes (effects)**

An exchange with similar projects will increase the knowledge in the entrepreneurial field. First for the project team but also for the companies participating in the project.

***Disclaimer: by sending the completed Project fiche, you agree for publication on the National Supporting Institution web site and dissemination to potential transnational partners for the purpose of effective implementation of transnational cooperation projects.***
